

Motion Sensor LED KIT

The motion sensor LED kit from Intelux is a PIR lighting system which activates as soon as your foot touches the floor. It gives a soft warm illumination to guide you safely through the room with no disturbing glare towards other people. The low energy LED is energy efficient and comes with an A+ rating. This product is complete with sensors, LED strip and power supply. The timer allows the sensor to come on for a desired length of time. We use the latest technology in the SMD 3528 and with an IP65 rating the product can handle water splashes, dust and dirt

It can be easily installed using the 3M adhesive backing and can be used in many applications such as under bed lighting for nursing homes.

Light Source	LED flexible strip
Lamp power	2.4 W/M
Colour Rendering Index	> 85
Input Voltage	DC 12V
Working Lifetime	50 000 hours
Emitting colour	Warm white
LED quantity	45 LEDs per metre
Ingress protection	IP65
